EXPERIENCE

SalesRabbit

Lead UX Designer | Oct 2022 - Present

- Consolidated three products (SalesRabbit, Rooflink, Roofle) with no shared design foundation. Reverse engineered components from production codebases using Claude into design systems.
- Stabilized and grew the design team through intentional backfills, a clear growth framework, and strong 1:1 feedback practices that built psychological safety.
- Partnered with Product and Engineering to shape roadmap priorities. Used customer research and design rationale to push back on scope and reorder what shipped first.
- Directed the mobile platform rewrite, pulling from HIG and Material Design to build a single Flutter design system across iOS and Android. Surfaced inconsistencies across contractor teams and established scalable patterns.
- Championed AI-assisted workflows (Bolt, Cursor, Claude, Figma, ChatGPT) for research, rapid prototyping and faster design decisions across the team.

Cricut

Senior UX Designer | Jun 2017 - Oct 2022

- Owned end-to-end UX for Cricut Access, a subscription product with millions of active members globally, across acquisition, onboarding, and retention flows on iOS, Android, and web.
- Redesigned shop navigation architecture, scaling to 7 country-specific variations. Drove 25% increase in menu engagement, 18% lift in average purchase size, and 42% drop in compatibility-related support tickets.
- Launched social features in Cricut Design Space: user profiles, sharing, collections and moderation.

Overstock

Senior UX Designer | Jul 2015- July 2017

- Designed checkout and email flows for a high-traffic e-commerce platform, with direct impact on conversion across consumer and partner surfaces.
- Established and maintained the style guide across responsive web and mobile apps, serving as the de facto design system owner before formal systems were standard practice.
- Led user testing with both consumers and internal partners to identify friction and validate cross-platform improvements.

Intellity

Lead Designer | Jun 2010 - July 2015

- Designed the guest-facing experience across TV, mobile, iPad, and touchscreen surfaces for a hospitality platform deployed at luxury properties including Four Seasons, Conrad, The Peninsula, and The Plaza.
- Architected a multilingual CMS and analytics dashboard integrating with POS and PMS systems, giving hotel operators a unified view of content management and guest activity.
- Built a real-time staff request app enabling in-room service assignment and resolution plus room control interfaces for The Peninsula and Plaza hotels.

Rochester Institute of Technology

BFA in Graphic Design | Rochester, NY | Class of 2005
